

Genomic Projects design: success cases

Special session based on the currently and past genomics projects. The different projects' coordinators will expose the research approaches, their relation with the bioinformatics and obtained results. The different lessons learned from current and past genomic projects.

Date: Wednesday 27 October .

Place: Hotel Son Don Pablo. Sala Segovia.

Chair: Victoriano Valpuesta. Fernández, University of Málaga

Program:

- Carmen Beuzón, "The need of going fast in a complex genome"
- Tomás Marqués , "Getting Deeper into Primate Genomes"
- Toni Granell, "One stop shop for tomato genomics: the value of centralization"
- Ana Tereza Vasconcelos, "Brazilian Genomics activities in a nutshell"
- Jordi García Mas, 'How to sequence a plant genome with next generation sequencing technologies: the melon genome project'
- Antonio Figueras , 'Genomes and Genomics in Aquaculture.'
- (TBC) 'International Cancer Genome Consortium'
